About

Full Stack Developer with a Bachelor's from Üsküdar University and internship experience in front-end and back-end development. Proficient in JavaScript, Express.js, and React.js, with a focus on building user-friendly interfaces and optimizing performance. Passionate about clean code and impactful solutions.

Experience

Back end Trainee · TAP · Amsterdam, Netherlands (Remote)   Sep '24 - Dec '24

· Worked on an e-commerce backend using Node.js, Sequelize, and MySQL, developing and debugging APIs.
· Participated in sprint retrospectives and worked with mentors to troubleshoot issues in staging and development environments.
· Used database queries and logs to identify and resolve bugs, contributing to cleaner releases.
· Helped document backend issues and their solutions to improve team knowledge sharing.

Front end Intern · trustangle · Gaza, Palestine   Aug '23 - Oct '23

· Built and tested front-end components, using developer tools and browser logs to fix rendering bugs.
· Participated in issue tracking and documentation of recurring bugs during QA and handover phases.
· Utilized modern frameworks to improve performance and maintainability of web applications.

Education

Üsküdar University | Bachelor's Degree   Grad Jul '24

Software Engineering · Grade: 3.5

Projects

E-Commerce System ·   Nov '24

· Designed and structured the database schema to support efficient handling of product listings, user data, and orders.
· Developed secure login and sign-up functionalities using JWT, ensuring robust user authentication.
· Implemented backend logic for handpicked product collections to enhance personalized user experiences.
· Optimized database queries and performance using Sequelize hooks for faster data retrieval and processing.

AskMe Q&A Application ·   Jun '23

· Developed a full-stack Q&A platform using Next.js that enables secure and anonymous user interactions, allowing users to create profiles, post questions, and engage with others anonymously
· Integrated NextAuth.js and Prisma for robust authentication and efficient database management.
· Built a UI with NextUI and Tailwind CSS, optimizing the design for both desktop and mobile .
